

**Our Expert.
Your Plant.
All Day.
Free.**

We'll help assure that your next boiler project gets up and running smoothly and stays that way.

Qualified purchasers of boiler control systems made by us are entitled to an all-day-on-site review by a direct factory expert from Clark-Reliance®.

We'll Verify the Installation

Any discrepancy between what we specified as proper installation and what we observe will be immediately reported to your operators, followed by a written report. Your new boiler level and control system will be verified to be in compliance with Section 1 of the ASME Code.

We'll Teach the Code to your O&M People

Understanding Section 1 of the ASME Code, PG – 60 is critical to the operation and maintenance of control instrumentation. We'll train your crew in the accepted standard practices.

Hands-On Training

Our expert will guide your people through each Reliance device: operation, maintenance, and proper scheduling...it's all here. We will provide instruction manuals and drawings for future reference.

Program Benefits

- Greatly reduced start-up issues
- Increased safety for plant and personnel
- More stable operations, less frequent and more predictable maintenance
- Maximum equipment life

"It is a pleasure doing business with a company that works so hard at making sure the customer is taken care of after the sale."

"Thanks again for your professional services provided. Your services helped the successful startup and our people to gain the knowledge on the water column."

Why Does Clark-Reliance Offer This Free Service?

We are happy to invest up to a full day of our factory expert's time at your plant because it is a "win-win" effort: Your plant gets assurance that its boiler control system is installed properly, is fine-tuned for optimized performance, and will be properly maintained by your staff. Clark-Reliance gets reduced warranty-related issues and delighted customers experiencing maximized uptimes and heat rates!

"Jim and I would like to thank you for your expertise, professionalism and attention to detail. The reports are very thorough, the wiring diagram was put together in blazing speed, and the recommendations were spot on. Clark-Reliance left a lasting impression at ExxonMobil Beaumont!"

Over 125 Years of Boiler Knowledge

Clark-Reliance has been manufacturing boiler level controls since 1884...the largest and broadest line of level instrumentation in the world.
