Subject: Release of New Simpliport® 180 Illuminator & Viewing Hood Models in 316 Stainless Steel for Ordinary (non-hazardous) and Classified (hazardous) area locations

Ladies/Gentlemen,

We are please to announce our updated Simpliport® 180 Illuminator and Viewing Hood Models for ordinary and classified area locations. These updated models are now manufactured with 316 stainless steel panels for added durability in harsh environments.

We also have added new Illuminators for Hazardous (classified) areas which are approved for use in NEC, Class 1, Division 2 applications. These Illuminators are constructed with 316 stainless steel panels, as well. We are offering models with Power Supplies for local or remote mounting, as a convenience for our customers.

In addition, we are now offering Sun Shields as an option for the updated Simpliport 180 Viewing Hoods. The Sun Shield can be easily added onto Simpliport gage applications that are affected by sunlight.

For more information, please visit our website to view the latest Simpliport product bulletin and instruction manuals or contact your local Regional Manager or a Reliance Applications Engineer.

We wish you continued success with Reliance products, especially with these enhancements for Simpliport gages, which can be applied to upgrade any existing Simpliport gage installation.

Regards,
